

The allegations of patient harm go beyond the cases mentioned in this document, so we can expect more damaging revelations.

AHCH is a bigger organization than the department of paediatric surgery. We in that department and senior managers within the organization must all accept a measure of responsibility for getting ourselves into what can only be described as a major crisis.

There are only two possible outcomes; major departmental restructuring (on the quiet) with Jesudason returning in triumph to a position of unfettered leadership, or, a very dirty fight, fully in the public eye, with the organization's chief weapon being to bring Jesudason (who remains a talented surgeon and researcher) before the GMC for sanction.

I think he has the AHCH organization over a barrel.
